How to configure a Windows 8 Device to Open DNS

Open DNS

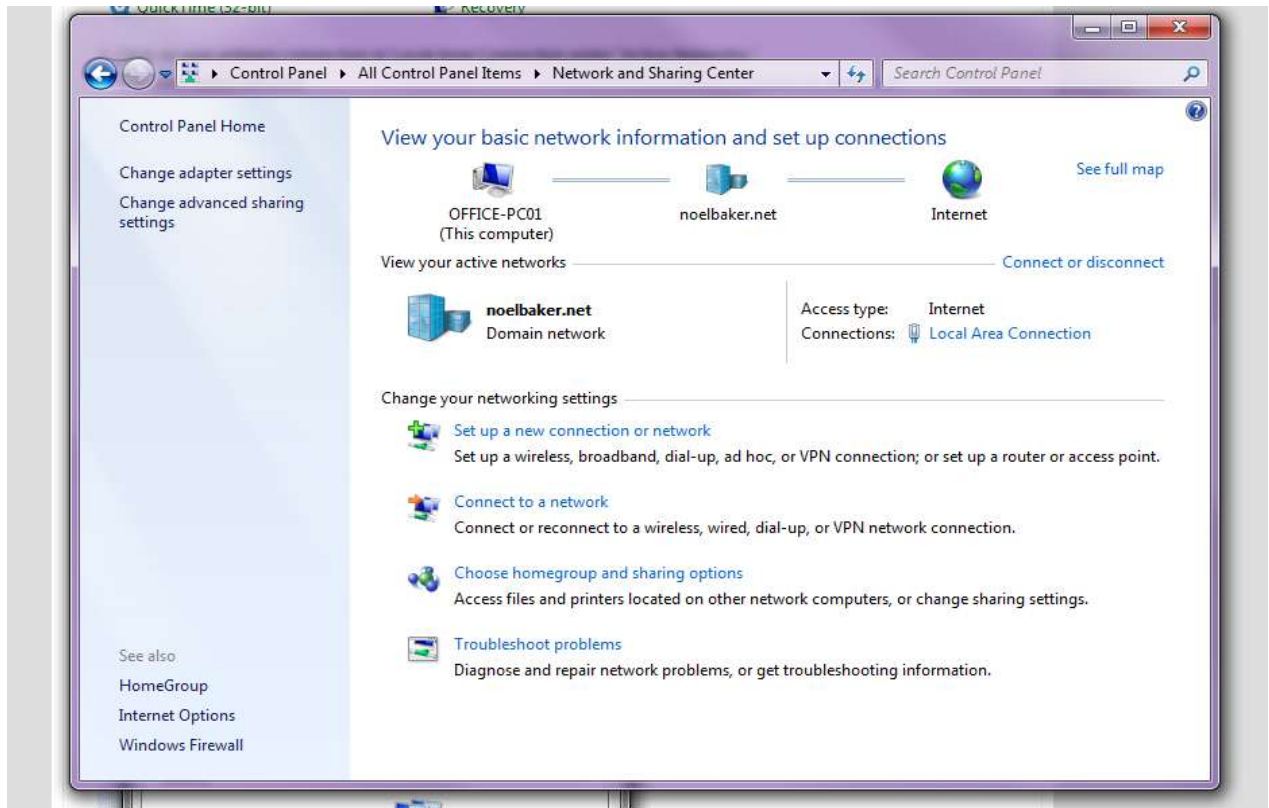

Open DNS provides a cloud-delivered network security services, delivering automated protection against advanced attacks for any device, no matter where it is. Family shield is pre-configured to block adult content, you can set it up and forget about it.

How to Configure

1. Go to **networks icon**.
2. Select **open network and sharing centre**.

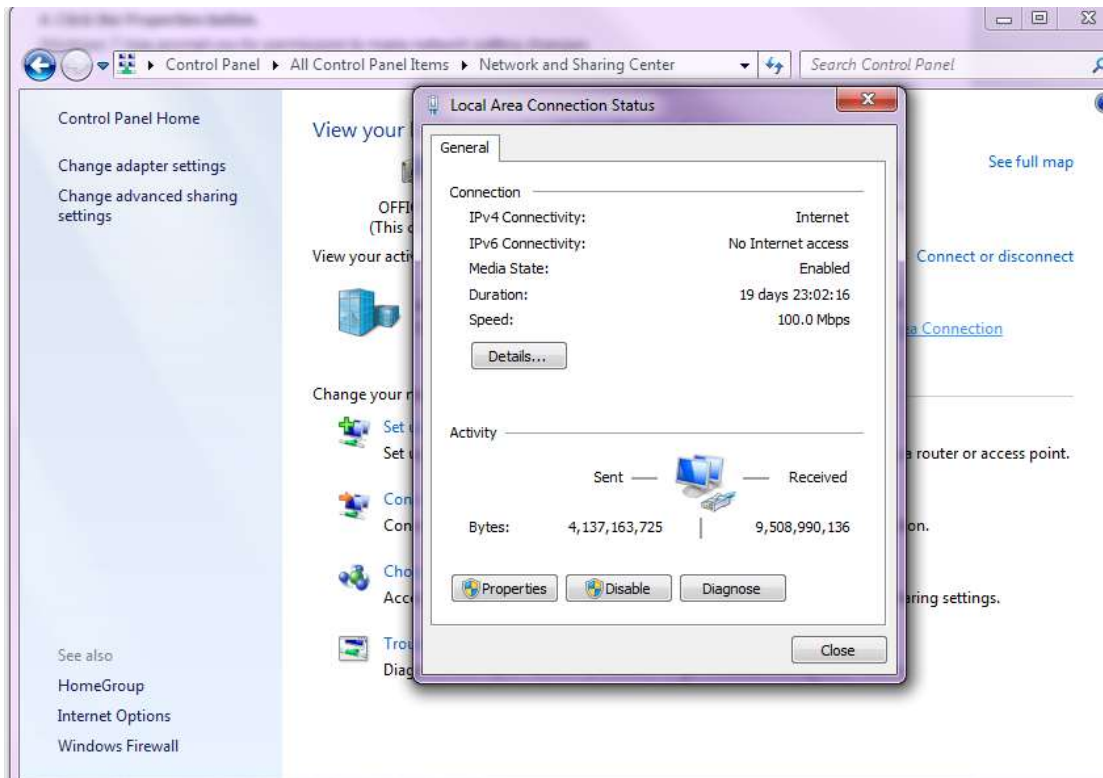

3. Find **Local Area connection** or **Primary connection**, in Active Networks.
4. Click on the link to open another window.

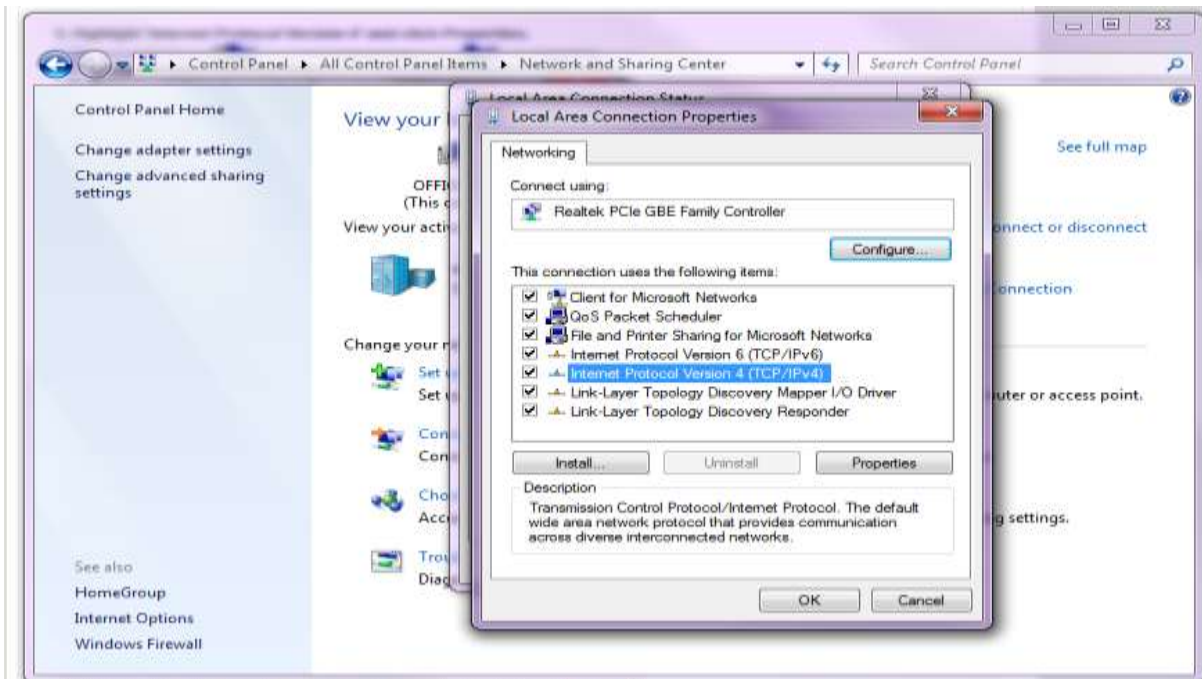

5. Click on **Properties** in new window.

6. May ask for permissions- enter administration details if this shows.

7. Click on **Internal Protocol Version 4 (TCP/IPv4)**.

8. Click on **Properties**.

9. Choose **Use the following DNS Server Addresses**.

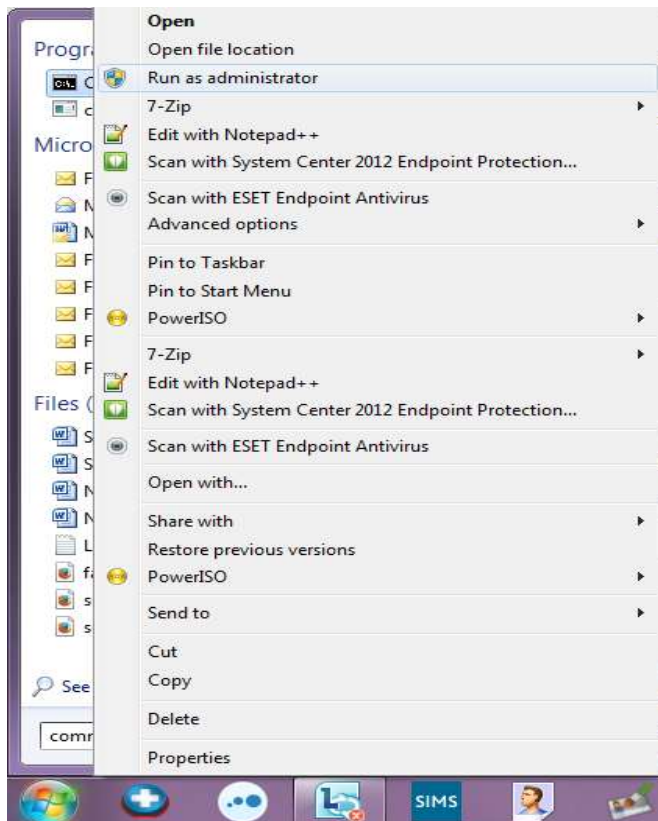

10. Input Open DNS Server addresses, into gaps.

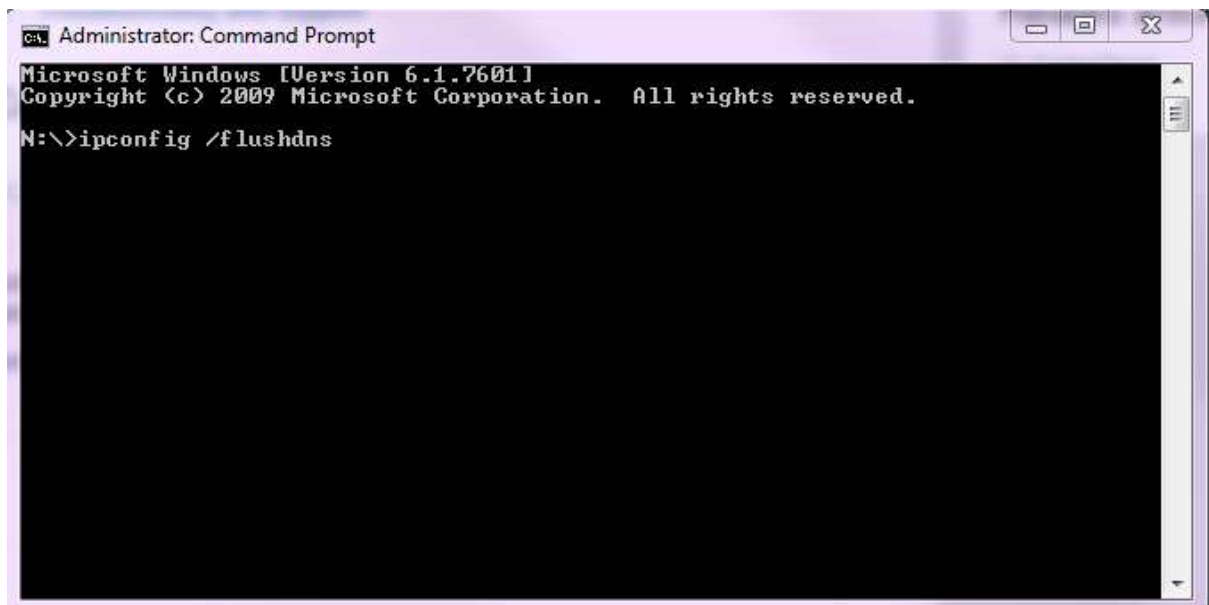

11. Click **Ok** and close each of the windows.
12. Flush DNS and Browser Cache.
13. Go to **start menu**.
14. Search **command prompt**.

15. Right click and choose **run as administrator**.

16. In new window type: **ipconfig /flushdns**
