

SYCAMORE OFSTED

We are very proud to have been judged good in all areas in our most recent inspection on 19th and 20th November 2014. It was very pleasing that the report recognised the strength of the school's leadership and the rapid progress that the school continues to make and sustain for the benefit of its pupils. Progress is good throughout the school and this is contributing to raising attainment levels.

All staff are fully committed to the on-going success of the school and the pivotal role that teaching assistants make to pupil learning is a key feature in supporting the needs of our pupils. Governors are very supportive of the school and are now keen to extend their knowledge and experience to drive forward high-level future impact. The school's extensive and broad curriculum caters well for the needs of its pupils. Pupils have good attitudes, enjoy learning, feel safe and behave well.

As a school, we need to continue our good work so that our pupils not only make really good progress but also attain higher so they can compete with their peers nationally. Consistent systems are in place and these need to be evaluated strategically to ensure maximum impact for pupil outcomes. We are confident that we are moving in the right direction and our action plan will now focus on becoming outstanding in the near future.
